Recommendation

While searching the internet for someone to translate archival documents I came across Mr. Stanislaw Zielonka (<http://rosyjski-tlumacz.pl>).

We've immediately established a common philosophical understanding of my needs. Then, following my way of thinking and specific demands, he proved to be up for the challenge.

The texts were translated clearly and precisely, even though one of the documents was not fully legible. Still the translator coped well and managed a faithful translation.

I am full of praise for his work and can recommend him to anyone needing translations to and from the Russian language.

With regards,

Marcin Bączyk
